

# AWS Architecture and Resource Icons for $\LaTeX$

Glen Newton

[glen.newton@gmail.com](mailto:glen.newton@gmail.com)

December 28, 2020

## Contents

<b>1 What is this?</b>	<b>1</b>
<b>2 How to use it?</b>	<b>1</b>
2.1 Examples	1
<b>3 Source</b>	<b>2</b>
<b>4 Resources</b>	<b>3</b>
<b>5 Architecture</b>	<b>17</b>
<b>Index</b>	<b>29</b>

## 1 What is this?

- List of AWS icons, converted to  $\LaTeX$ -compatible form using [Inkscape](#) (v0.92.4 (5da689c313, 2019-01-14)) using the Go program [aws2tex](#). This Go program also generates the icons portion ( $\LaTeX$ ) of this document.
- All generated icons are written to the `icons_tex` directory.
- This document is to illustrate as well as index these icons. In order to keep the size of this document manageable, it only contains:
  - For Resources, only the `_Light` versions. The `_Dark` are omitted.
  - For Architecture, only the `_64` versions. The lower resolution `_16`, `_32`, `_48` are omitted.

While the above icons are omitted in the document, they are all included and available for use, in the `icons_tex` directory.

For instructions on how to generate this document with *all* icons, please see the instructions in the README.md at the github repo.

- This document is found in: <https://github.com/gnewton/awsArchIcons2LaTeX>

## 2 How to use it?

Icons can be added to  $\LaTeX$  documents using the `\includegraphics` command:

```
Here is an API Gateway:  
\includegraphics[width=1cm]{../icons_tex/Arch_Amazon-API-Gateway_64.pdf}
```

Resulting in:

Here is an API Gateway: 

[Without the gray background]

### 2.1 Examples

See the [examples](#) directory at the github repo.

### 3 Source

AWS Architecture Icons from <https://aws.amazon.com/architecture/icons/>.

Assets package used: [AWS-Architecture-Assets-For-Light-and-Dark-BG\\_20200911.478ff05b80f909792f7853b1a28de8e28eac67f4.zip](#)

© Glen Newton 2020

Icons in this document (I believe) are © Amazon Web Services (AWS)
